

## PREVENTING EVICTION

During COVID-19, it is more important than ever to prevent evictions and keep people housed. As the UN Special Rapporteur on the Right to Adequate Housing said recently, “[Housing has become the frontline defense against the coronavirus](#). Home has rarely been more of a life or death situation.” Housing is a form of health care, imperative to our collective response to the COVID-19 pandemic. For more information on the right to housing in Canada, please visit: [www.housingrights.ca](http://www.housingrights.ca).

Below are tips and resources to prevent evictions specifically during the pandemic. You can also refer to the BFZ-C [Prevention page](#) for general homelessness prevention resources.

See the Government of Canada’s [companion document](#) on how the Homeless Individuals and Families Information System (HIFIS) can help Prevent Eviction during COVID-19 ([En Francais](#)).

### Landlords and Tenants Should Discuss Rent Options

- It’s important for both sides to have empathy during this difficult time.
- Tenants who cannot pay rent should reach out to their landlord to discuss payment options.
- If there is an eviction ban in your province and someone is evicted it is likely not a legal eviction – consult legal clinics in your province (see resources below by province/territory).
- Housing First workers can proactively call the landlords they are working with to let them know they are working, rents will be paid on time etc. For further information on tenant contact and support, access CAEH’s COVID-19 Resource on [Home Visits](#).
